

# My Hobby

I'm interested in traveling. It's my favorite activity in free time. Travelling around the world is the best possibility to relax and you've got a chance to know new countries and their beauties. I actually haven't visited so many countries but across Slovakia I have travelled from top to bottom and I still have not visited all regions. I prefer travelling by car or train to other ways of transport.

My favourite place in Slovakia are the Tatras. I think I have the great happiness that I come from there. There are many caves which I would recommend to everyone to visit. Fresh Tatras' air is good for all of us and tourism is belongs to favourite sports. But I rather prefer a flat terrain or slightly upward to a steep hill.

The history of our hometown is also interesting. I don't know how many castles or ruins we have in Slovakia.

The most interesting place is Herľany. I haven't been there yet but I heard that there is the only geyser in Slovakia which spurts from the ground up to the height of more than 60 meters. I think travelling is a great relaxation. You break free and you meet a lot of new people. I would like to know entire Slovak country and then to continue to other countries. If we lived on average two hundred years longer, maybe I would reach it.
